

## Platform Engineer

The energy transition requires smart and decisive professionals. In Datacenter Networking, we work every day on managing infrastructure, cybersecurity, system innovation, software and secure and reliable technology solutions that support business operations and digital transformation, ensuring that the Netherlands can continue to rely on a stable electricity grid in the future. Will you contribute to this as **Platform Engineer** Datacenter Networking?

### Your contribution to TenneT

How will you keep the Netherlands running? As **Platform Engineer** Datacenter Networking, you are responsible for implementing initiatives to improve the availability and performance of the IT infrastructure, ensuring that the Netherlands can continue to rely on reliable, affordable and sustainable energy. You will be working in the Datacenter Networking team, consisting of **12** colleagues. In addition, you will be responsible for:

- Performing administrative and operational tasks on the (network) infrastructure.
- Monitoring and safeguarding the availability and performance of the (network) infrastructure.
- Investigating and resolving (complex) 2nd- and 3rd-line incidents in the (network) infrastructure.
- Writing change proposals and problem reports in response to incidents and planned changes.

### Your profile and background

At TenneT, we look for professionals who contribute to an effective and future-proof project organisation. We expect you to have the right experience and skills to make a valuable contribution to our team and our mission. Therefore, we ask for:

- A completed HBO+ degree in Computer Science.
- Proven experience in at least 3 to 5 years of hands-on experience within complex IT infrastructure environments.
- You have extensive knowledge of the products listed below and the associated management tooling certification in one or more of these products is a plus.
- Cisco Nexus and Arista switches (with protocols such as BGP, OSPF, IS-IS).
- Check Point, Palo Alto.
- A10 load balancer.
- Aruba ClearPass & Wireless.
- Experience with Ansible is a plus..

To make a difference in this role, you recognise yourself in the following competencies:

- You are an excellent communicator who sets boundaries, gives solicited and unsolicited feedback, and can express yourself well

### Additional information

TenneT gives you the opportunity to contribute to a sustainable energy future. Together with colleagues, partners, and stakeholders, you work on innovative solutions that enable the energy transition. You'll have room to develop your talents in an environment where your growth is a priority.

We offer you:

- Type of contract is indefinite.
- A salary in scale 7: €4,211 to €7,447 per month (based on a 40-hour work week).
- A solid pension through ABP, with 70% of the premium paid by us.
- 43 vacation days per year.
- Hybrid working.
- TenneT conducts a Certificate of Good Conduct (VOG) screening and an AIVD security screening for this position.

We value a healthy work-life balance and your personal development. That's why we offer flexible benefits such as:

- Support for your vitality, with contributions towards a gym membership and health insurance.
- Development opportunities through the TenneT Academy, so you can continue to expand your knowledge and skills.

### Our offer

We are family friendly and flexible

Health - your basis

Modern working environment

Attractive remuneration and social benefits

Personal development

### Our recruiting process

In our online-application-form you can apply within minutes as long as this job is posted. Afterwards we screen your application and get back to you as soon as possible. Our selection process consists of two

- (both verbally and in writing) in Dutch and English;
- You have strong analytical skills and can think conceptually;
  - You are innovative, professional, results-oriented, proactive and loyal;
  - You have sufficient persuasiveness, are flexible and a true team player;
  - You are used to working in an Agile team, but also according to ITIL processes;
  - You are full of energy, resilient under pressure and also risk-aware;

interviews.

For questions regarding the recruitment process, please contact:

Judith Segura - van Bruggen | Corporate Recruiter | [judith.segura-vanbruggen@tennet.eu](mailto:judith.segura-vanbruggen@tennet.eu)

For questions relating to the position, please contact:

Alexander Heuts | Manager IT | [Alexander.Heuts@tennet.eu](mailto:Alexander.Heuts@tennet.eu)

This is a complex environment in which 24-hour availability is essential. The candidate must therefore be willing to participate in a 24x7 on-call rotation when requested.

This role falls under the function profile **IT Specialist**, ensuring clarity for both you and TenneT regarding the responsibilities, expectations and growth opportunities associated with this position.

## This will be our challenge

Digital & Technology Transformation (DTT) is TenneT's digital backbone. The division makes smart use of data, technology, and AI to optimise grid utilisation and strengthen decision-making.

DTT delivers integrated and secure digital, technology, and data services that contribute to efficiency, innovation, safety, and compliance. The division supports business processes and workplaces with IT, develops data and integration platforms, and manages our infrastructure and cybersecurity. In this way, DTT accelerates TenneT's transformation into a digital TSO.

## AI and more about TenneT

Since we use AI as part of our recruiting process, we would like to create transparency and clarity at this point. The AI serves exclusively as a supporting and recommending tool to make our processes even faster and more efficient. At no time are automated decisions made.

---

TenneT is a leading European grid operator. We are committed to providing a secure and reliable supply of electricity 24 hours a day, 365 days a year, while helping to drive the energy transition in our pursuit of a brighter energy future – more sustainable, reliable and affordable than ever before. In our role as the first cross-border Transmission System Operator (TSO) we design, build, maintain and operate over 25,000 kilometres of high-voltage electricity grid in the Netherlands and large parts of Germany, and facilitate the European energy market through our 17 interconnectors to neighbouring countries. We are one of the largest investors in national and international onshore and offshore electricity grids, with a turnover of EUR 9.2 billion and a total asset value of EUR 45 billion. Every day our 8,300 employees take ownership, show courage and make and maintain connections to ensure that the supply and demand of electricity is balanced for over 43 million people.
