Enterprise Architect Cyber Security

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a seasoned Enterprise Architect Cyber Security (m/w/d) who will contribute to this and that might be you?

Your contribution to TenneT

The Enterprise Architecture function is in the Business Technology Organization (BTO) of TenneT.

You work within the Enterprise Architecture team of the BT-Office. In addition, you work together with BTO's IT Architects, Security team and CISO to evolve on and continuously improve Cyber Security architecture standards and overall architecture landscape. We need integrated architecture combined with end-to-end process focus to improve the solid foundation of Processes, Data, Applications and Information Technology. You are the contact person for senior leadership regarding all Cyber Security related topics and required decisions.

We are looking for someone that:

• Takes ownership of the cyber security domain, the process and products,

• Shows courage and stands for his/her vision, gets people on board by steering from their beliefs,

• Actively connects with all stakeholders, he/she collaborates with business, external suppliers, IT architects, and all relevant stakeholders to ensure a shared architectural vision. He/she is especially strong in organizing and mobilizing the organization to reach that joint vision.

Besides this, you:

• Actively contribute to the development, assessment, and realization of the Enterprise Architecture and the Enterprise Architecture Governance

• Establish principles, governance and guidance for maturing our cyber security capability

• Develop and implement the enterprise-wide cyber security architecture and framework, aligned with industry best practices and regulatory requirements.

• Develop the roadmap, and outline how this target architecture is realized

• Set expectations for quality, consistency, and delivery, ensuring that those standards are met and improved over time

• Monitor implementation of key cyber security related projects, and ensuring proper escalation and reporting to senior management stakeholders

• Proactively identify, analyse, review, and evaluate ideas, projects, and opportunities on cyber security topics

• Foster a culture of security awareness and education among employees, promoting best practices and proactive threat detection and response

Additional information

- As of 1st of of October or November
- The weekly working time is 36-40 hours
- The position is unlimited

Our offer

Our recruiting process

In our online-application-form you can apply within only some minutes as long as this job is posted. Afterwards we screen your application and get back to you as soon as possible. Our selection process consists of two interviews and an assessment.

For questions relating to the position:
Eric de Jongh
Head of BT Office

Your profile and background

• 10+ years of experience in a similar function, preferably you have done this before. Having business (TSO/Utilities/Infra asset) understanding is a big plus.

• Strong experience in leadership roles, focusing on architectural solutions for strategic importance. You negotiate support for difficult decisions, anticipate problems, and ensure that credibility and trust are uncompromised.

• Strong experience with industry standards and best practices in information security and risk management (including cyber security)

• In depth knowledge on IT infrastructure, software development, software architecture, and cyber security in general

• Ability to motivate stakeholders to fit Cyber Security architecture into the company's strategy. You do this by inspiration rather than through direct authority

• Capable to functionally guide the IT Architects in the domain

• Relevant certifications such as CISSP, CISM, or TOGAF are preferred

• Good communication and presentation skills in English. Fluent in German and/or Dutch is an advantage

This will be our challenge

BTO will drive security of supply, energy transition, organizational and financial health through digital, data and analytics. BTO will secure solid foundations through seamless end-user services (UX), industry-leading cybersecurity setup and resilient data centers and cloud infrastructure. BTO will have consistent business/BTO alignment, strategic partnerships with vendors and clear standards on architecture, vendor & portfolio management and security. BTO will unlock value of data and digital by building all the necessary enablers (incl. data platform, data governance processes, capabilities) and embedding innovation initiatives into business roadmaps.

TenneT is a leading European grid operator committed to a secure and reliable electricity supply - 24 hours a day, 365 days a year. We are shaping the energy transition for a sustainable energy future. As the first cross-border transmission system operator, we plan, build and operate an almost 24,500 kilometres long high and extra-high voltage grid in the Netherlands and Germany and are one of the largest investors in national and international electricity grids, on land and at sea. Every day, our 6,600 employees give their best and ensure with responsibility, courage and networking that more than 42 million end consumers can rely on a stable electricity supply.

TenneT is an equal opportunity employer for ALL and is fully committed to the principles of equal employment opportunity to ensure that all applicants and employees are considered for recruitment, promotion and employment regardless of their ethnic origin, skin colour, religion or belief, gender, national origin, age, disability, sexual identity, marital/family status.
