

Business Analyst

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a passionate Business Analyst at our location in Arnhem who will contribute to this and that might be you?

Your contribution to TenneT

Business Analyst - Power Platform Specialist

We are seeking a Business Analyst with a passion for innovation, automation and a drive for excellence to join the Centre of Excellence (CoE) "Enterprise Automation" within the Enabling Functions department of TenneT Business Technology Organization (BTO).

As a member of our team, you will play a crucial role not only in the roll-out but also in the ongoing management of the Power Platform services. Your focus will be on empowering business users to automate their workflows and create their own applications, providing the tools and support necessary to foster an environment of self-sufficiency and technological confidence. When needed, you will also oversee the outsourcing of complex projects to ensure that we continue to meet our high standards of innovation and efficiency.

Embark on a journey with us where your expertise will inspire change and drive the digital empowerment of our workforce.

Key Responsibilities:

- Contribute to the implementation and operational management of the Microsoft Power Platform at TenneT.
- Identify & evaluate automation opportunities, acting as a spokesperson for automation technologies within the organization.
- Collaborate with internal stakeholders to define requirements and our external strategic partners to outsource solution development & maintenance.
- Support, train and build up the Power Platform community & key-users within the business.
- Contribute to the development and best practices within the CoE.

Your profile and background

Required Qualifications:

- Proven experience with Microsoft Power Platform (Power Apps, Power Automate, Copilot Studio).
- Structured and analytical approach to problem-solving.
- Responsible, result-oriented, and quality-focused, with a continuous improvement mindset.
- Excellent communication skills and the ability to interact

Additional information

- As 1st of July.
- The weekly working time is 40 hours.
- Type of contract is indefinite.
- Job interviews for this position will be in English. Please send us your application document in English as well.

- effectively at different levels within the organization.
- Fluent in Dutch and English with the ability to communicate effectively within a professional environment.
- Bachelor's degree in Business, Information Technology, or a related field.

This will be our challenge

BTO will drive security of supply, energy transition, organizational and financial health through digital, data and analytics. BTO will secure solid foundations through seamless end-user services (UX), industry-leading cybersecurity setup and resilient data centers and cloud infrastructure. BTO will have consistent business/BTO alignment, strategic partnerships with vendors and clear standards on architecture, vendor & portfolio management and security. BTO will unlock value of data and digital by building all the necessary enablers (incl. data platform, data governance processes, capabilities) and embedding innovation initiatives into business roadmaps.

TenneT is a leading European grid operator committed to a secure and reliable electricity supply - 24 hours a day, 365 days a year. We are shaping the energy transition for a sustainable energy future. As the first cross-border transmission system operator, we plan, build and operate an almost 24,500 kilometres long high and extra-high voltage grid in the Netherlands and Germany and are one of the largest investors in national and international electricity grids, on land and at sea. Every day, our 6,600 employees give their best and ensure with responsibility, courage and networking that more than 42 million end consumers can rely on a stable electricity supply.

Lighting the way ahead together
