

Systems Engineering Workstream Advisor

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a passionate **Systems Engineering Workstream Advisor** at our location Arnhem who will contribute to this and that might be you?

Your contribution to TenneT

Large Project Offshore (LPO) is implementing the systems engineering (SE) approach in the 2GW program. Applying Systems Engineering is a new way of working for most people that work on behalf of TenneT and her contractors. Goal is that tasks and responsibilities in the SE approach will be part of everyone's daily work.

To achieve this we are looking for a passionate **Systems Engineering Workstream Advisor** at our location in Arnhem, who will contribute to this and that might be you? In this role, you will serve as the Single Point of Contact (SPOC) for Systems Engineering (SE) within the designated workstreams of the 2GW program. These workstreams represent the internal stakeholders of the 2GW program. You will be positioned within the Project management Office (LPO-PMO). Occasionally you will travel to Hannover. You will report to the Lead information management.

Main tasks:

- Serve as the main point of contact and subject matter expert for Systems Engineering on behalf of the 2GW Program for the different Workstreams.
- Establish and maintain effective communication channels with workstream leads, engineers and stakeholders to ensure alignment with SE principles and processes.
- Provide guidance and support to workstreams in adhering to 2GW standards, methodologies, and processes.
- Collaborate with requirement owners and stakeholders to validate and verify the correctness and completeness of requirements within the library.
- Ensure that requirement owners have access to the necessary tools and resources to perform validations effectively.

Your profile and background

- Experience with Systems Engineering processes such as Requirements Engineering, Verification and Validation, System Analysis, etc.
- Strong knowledge of ISO 15288
- INCOSE Certification (ASEP, CSEP, ESEP) would be a huge plus
- Proven experience in guiding and advising project teams
- Experience working with Requirements Management software tool(s).
- Strong problem-solving abilities, with the capacity to analyze complex situations and provide practical solutions.
- Detail-oriented mindset with a focus on accuracy and quality of

deliverables.

- Hands on mentality.

This will be our challenge

Large Projects Offshore is a key contributor to the energy transition. The Unit is responsible for the current and future development of the offshore grid as a whole and subsequently for the development and realization of the DC interconnectors and the Offshore Wind Farm grid connections in both the German and Dutch sectors of the North Sea.

TenneT is a leading European grid operator committed to a secure and reliable electricity supply - 24 hours a day, 365 days a year. We are shaping the energy transition for a sustainable energy future. As the first cross-border transmission system operator, we plan, build and operate an almost 24,500 kilometres long high and extra-high voltage grid in the Netherlands and Germany and are one of the largest investors in national and international electricity grids, on land and at sea. Every day, our 6,600 employees give their best and ensure with responsibility, courage and networking that more than 42 million end consumers can rely on a stable electricity supply.

TenneT is an equal opportunity employer for ALL and is fully committed to the principles of equal employment opportunity to ensure that all applicants and employees are considered for recruitment, promotion and employment regardless of their ethnic origin, skin colour, religion or belief, gender, national origin, age, disability, sexual identity, marital/family status.

Lighting the way ahead together
