

Sub Project Lead Construction - Yard

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a passionate Sub Project Lead Construction at our yard location in Johor Bahru - Malaysia who will contribute to this and that might be you?

Your contribution to TenneT

The Sub-project Lead Construction is working in the site team at the shipyard in MMHE Malaysia for the construction works of the project and is in charge to oversee the delivery of three 2GW topsides and jackets. You are taking over full responsibility for the overall construction works within the dedicated project and ensures that the quality (incl. documentation, equipment, process robustness, etc.) is meeting all requirements (incl. contract, technical standard and best practice). You are responsible to approve the contractor's performance in terms of design and constructional contracts. Besides you are also responsible to ensure decision making with respect to technical questions and provides all relevant information required by the Lead Site Manager. In this role you will work together with a team of several specialists based in Malaysia, and additional specialists based in The Netherlands, who will be present when required. This team of specialists monitor the contractor activities and have the responsibility for guarding the contractual requirements of their appointed disciplines. This position will be located at a construction site/ship yard in Malaysia.

Overall tasks & responsibilities:

- Provide technical support for a team of specialists in Malaysia;
- Organize regular technical meetings with contractors (permanent on site for 5 years);
- Responsible for schedule monitoring and mitigation for delays;
- Assuring compliance of execution of yard activities is in compliance with design;
- Consultant and sparring partner for the other project members;
- Guardian of the contract processes within the project, including handling deviations and contract changes, handling requests for change (RfC);
- Manage activities and interfaces during commissioning.

General:

- Support regarding procurement;
- Responsible for all technical project management related activities and coordination of technical specialists regarding all design-relevant activities within the assigned scope;
- Support of Project Management with regards to risk and contract management;
- Monitoring of the contractor with respect to the follow up of SHE regulations;
- Coordination of directly assigned contractors (incl. framework contracts for technical support) as well as internal stakeholders (e.g. asset management);
- Support for development of WBS for project specific demands;
- Steering of work package fulfillment of technical specialists (escalation to team manager, in case of needed support or underperformance);
- Monitoring interface processing between sub project leads, internal and external technical specialists and other stakeholders;
- Responsible for review of technical documentation including, progress and quality control;
- Preparation and evaluation (in alignment with all relevant

This will be our challenge

Large Projects Offshore is a key contributor to the energy transition. The Unit is responsible for the current and future development of the offshore grid as a whole and subsequently for the development and realization of the DC interconnectors and the Offshore Wind Farm grid connections in both the German and Dutch sectors of the North Sea.

TenneT is a leading European grid operator committed to a secure and reliable electricity supply - 24 hours a day, 365 days a year. We are shaping the energy transition for a sustainable energy future. As the first cross-border transmission system operator, we plan, build and operate an almost 24,500 kilometres long high and extra-high voltage grid in the Netherlands and Germany and are one of the largest investors in national and international electricity grids, on land and at sea. Every day, our 6,600 employees give their best and ensure with responsibility, courage and networking that more than 42 million end consumers can rely on a stable electricity supply.

TenneT is an equal opportunity employer for ALL and is fully committed to the principles of equal employment opportunity to ensure that all applicants and employees are considered for recruitment, promotion and employment regardless of their ethnic origin, skin colour, religion or belief, gender, national origin, age, disability, sexual identity, marital/family status.

Lighting the way ahead together
