

Cost Engineering Advisor Offshore

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. Would you like to work on exciting offshore projects and become part of a dynamic team? Then you've come to the right place! We are currently looking for a Cost Engineering Advisor Offshore to help us drive forward the energy transition and take on exciting challenges.

Your contribution to TenneT

As a Cost Engineering Advisor Offshore, you are the ambassador and expert in the field of Cost Engineering. You know and develop the internal policy, ensure quality and support in the form of preparing budgets based on project specifications and planning.

Your tasks include:

- **Active participation in tenders:** You support the preparation of tender documents right from the start and take care of the financial framework (e.g. Provisional Sums) as well as the price sheet.
- **Keeping an eye on project costs:** You ensure that project management can make informed decisions at all times by providing an overview of costs.
- **Cost reports, negotiations and adjustments:** You monitor project expenditure and create precise cost reports. If required, you will participate in negotiations around project contracts. You will advise project management on major long-term contracts regarding cost adjustments (e.g. indexation clauses), working closely with contract management and the legal department.
- **Coordination and support of financial work streams:** You work hand in hand with our contractors in the framework and provide support with financial tasks.
- **Optimization potential:** During projects, you calculate the impact of changes and help to identify optimization opportunities at program level.
- **Offer analyses:** You check and validate the incoming offers.
- **Teamwork:** You work closely with other Cost Engineers and the project team and support Asset Management (AM) in the further development of our tools (e.g. models, systems, databases).
- **Professionalization:** You will contribute your own ideas and help to drive cost engineering forward in our company.

Your profile and background

What you bring to the table:

- You have a Bachelor's or Master's degree in construction, engineering, civil engineering or electrical engineering.
- At least 8 years of experience in similar activities - preferably in a company with a similar structure to TenneT.
- Experience with cost management software (e.g. PIN software) is a plus.

Additional information

What you can expect:

- An exciting and responsible job in a dedicated team. You will work on long-term, forward-looking projects in the offshore sector and can play an active role in shaping the energy transition.
- Salary for this position is in grade 8, between € 3.879,- and € 7.660- gross based on a fulltime position according to TenneT TSO CAO
- The weekly working time is 40 hours, this position can be fulfilled for 36 hours or more
- Type of contract is indefinite with a probation time of 2 months
- 43 vacation days annually
- Additional benefits such as: health insurance, internet and sport compensation
- Work hybrid, we stimulate a healthy work-life balance
- Interviews for this position will possibly be held in English (or Dutch)

Robert Wilhelm Grohnau
Lead Project Management Office - Hiring Manager

- You have experience in the offshore, electrical or construction industry.
- Certifications such as CCT or CCE are welcome.
- You are accurate, results-oriented and have an analytical mind. You are also curious, communicative and understand how projects work.
- People around you describe you as a helpful team player who easily builds relationships and motivates others through personality.
- You are fluent in Dutch and can communicate confidently in English.

This will be our challenge

Large Projects Offshore is a key contributor to the energy transition. The Unit is responsible for the current and future development of the offshore grid as a whole and subsequently for the development and realization of the DC interconnectors and the Offshore Wind Farm grid connections in both the German and Dutch sectors of the North Sea.

AI and more about TenneT

Since we use AI as part of our recruiting process, we would like to create transparency and clarity at this point. The AI serves exclusively as a supporting and recommending tool to make our processes even faster and more efficient. At no time are automated decisions made.

TenneT is a leading European grid operator. We are committed to providing a secure and reliable supply of electricity 24 hours a day, 365 days a year, while helping to drive the energy transition in our pursuit of a brighter energy future – more sustainable, reliable and affordable than ever before. In our role as the first cross-border Transmission System Operator (TSO) we design, build, maintain and operate over 25,000 kilometres of high-voltage electricity grid in the Netherlands and large parts of Germany, and facilitate the European energy market through our 17 interconnectors to neighbouring countries. We are one of the largest investors in national and international onshore and offshore electricity grids, with a turnover of EUR 9.2 billion and a total asset value of EUR 45 billion. Every day our 8,300 employees take ownership, show courage and make and maintain connections to ensure that the supply and demand of electricity is balanced for over 43 million people.
