

Lead Asset Chain Process & Quality

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a passionate **Lead Asset Chain Process & Quality** at our location **Arnhem** who will contribute to this and that might be you?

Your contribution to TenneT

TenneT plays an important role in the Energy Transition, keeping a functioning grid up and running while expanding its capacity massively. With more information available in a more and more dynamic world, performing our asset management task on balancing cost, performance and risk in decision making is a challenging one. Strategic choices are needed to be made for our Target information architecture as part of our Target Grid 2045. What will the grid look like? How will it be operated and maintained? And what information is needed by whom to perform a top job?

At the same moment, in our current information landscape, together with our stakeholders we have identified a significant amount of improvements that need to be implemented properly to guarantee business continuity today and tomorrow. These improvements can only be successful when steered from a chain perspective, distinguishing between information Demand and information Supply.

The department of Asset Information is responsible for developing the complete intelligence around data, i.e. what do you do with it. In order to achieve TenneT's objective of doing more with the same number of people, information and how to deal with it plays a crucial role.

The tasks of your team are partly operational and partly strategic. For example, this team will be responsible for organising the ongoing asset chain processes (Asset Committee, PMP process, Asset Chain Initiative) and will also develop a vision of the role of the Asset Manager in TenneT's End-to-End processes, taking into account norms, standards, laws and regulations such as NTA8120, ISO55000 and ISO27000.

Your role and responsibilities:

- Together with the chain partners in our organization, you will be responsible for further maturing our Strategic Asset Management Plan (SAMP), but also facilitating the Asset Committee (AC) including the federated data governance;
- Part of the management team Asset Information and you report to the Head of Asset Information team;
- Together with a team of about 15 colleagues, you will be responsible for successfully running and improving the Information landscape in line with Enterprise Architecture principles: pulled by the Process landscape and pushed by the Application landscape. Examples of topics to pick up are:
 - Portfolio Management of the improvement portfolio for Build the Grid, and Maintain the Grid;
 - Building Information Management (BIM);
 - Improvement of User Acceptance protocols (TERRA and

Your profile and background

- Academic working and thinking level and a master degree; advanced courses in data/information management and/or business administration e.g. Information Systems, Electrical and/or Mechanical, Control & Automation are preferable;
- Multiple years' of proven experience in managing teams in (matrix) organizations with a diversity of stakeholders and complex business cases;
- Experience in change and implementation management of new processes in agile as well as waterfall setup;
- Preferably experience in managing (virtual) teams with very diverse professional and deep expertise skills in multiple locations;
- As we continue to collaborate cross border, regular travelling between our offices in Arnhem, Leirte and Bayreuth;
- You're a bridge builder between people and concepts and a people oriented leader with relevant experience in Digitalization and in Asset Management;
- Act as a role model and create the right context for employees to show the desired mind-set and behaviour in line with TenneT's leadership profile (Connection, Ownership and Courage).

AI and more about TenneT

Since we use AI as part of our recruiting process, we would like to create transparency and clarity at this point. The AI serves exclusively as a supporting and recommending tool to make our processes even faster and more efficient. At no time are automated decisions made.

TenneT is a leading European grid operator. We are committed to providing a secure and reliable supply of electricity 24 hours a day, 365 days a year, while helping to drive the energy transition in our pursuit of a brighter energy future – more sustainable, reliable and affordable than ever before. In our role as the first cross-border Transmission System Operator (TSO) we design, build, maintain and operate over 25,000 kilometres of high-voltage electricity grid in the Netherlands and large parts of Germany, and facilitate the European energy market through our 17 interconnectors to neighbouring countries. We are one of the largest investors in national and international onshore and offshore electricity grids, with a turnover of EUR 9.2 billion and a total asset value of EUR 45 billion. Every day our 8,300 employees take ownership, show courage and make and maintain connections to ensure that the supply and demand of electricity is balanced for over 43 million people.
