

## Lead Power Systems & Offshore

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a passionate **Lead Power Systems & Offshore** at our location in **Arnhem** who will contribute to this and that might be you?

### Your contribution to TenneT

In the **Asset Management** team of Robert-Jan de Bes we've an opening of Lead Power Systems & Offshore. In this challenging role you're responsible for the overall leadership and development of the team **Platforms, HVDC & Auxiliary Power** as well as for coaching, inspiring and developing employees and organization. You will collaborate extensively with other Asset Management teams involved in offshore and in the end to end processes with other units to realize our strategy Build and Maintain the Energy Grid.

#### Your responsibilities:

- Responsible for the technical governance, standardization as well as quality assurance and control for the relevant Offshore Platform technology, HVDC and Auxiliary Power components for DC stations;
- Developing and maintaining concepts, designs, technical specifications, guidelines and definition of functions, covering the life cycle (incl. analysis of fault events) of the relevant components under consideration of stakeholders needs;
- You ensure the knowledge transfer and process optimization. Furthermore you are point of contact for interfaces across teams in the unit and with TenneT in Germany;
- Strengthening, harmonizing and innovating TenneT's overall approach to basic engineering for offshore platforms;
- Contribute to technical supplier management (pre-qualification, tenders, framework contracts, supplier selection);
- The leadership and coordination of internal projects, membership in relevant internal and external committees and the representation of TenneT in relevant business associations and towards public authorities are also your tasks.

### Your profile and background

- A master degree in Electrical or Mechanical Engineering, Marine Technology or a comparable qualification as well as a minimum of 10 years' of relevant experience;
- You recognize yourself as an entrepreneurial, committed, hands-on motivator and leader, who leads in a convincing manner, with fine sense of organizational dynamics and collaboration;
- You bring the ability to be a respected partner for peer managers and external stakeholders (e.g. public authorities, contractors, DSOs or other TSO's);
- Knowledge about offshore substation and relevant component requirements for a TSO;

### Additional information

- The weekly working time is 40 hours.
- The position is indefinite.
- Job interviews for this position will be (partly) in English. Please send us your application document (resume and motivation letter) in English as well.
- Maximum salary of **€ 10.122,-** gross per month (grade 18) based on a fulltime agreement.

### Our offer

We are family friendly and flexible

Health - your basis

Modern working environment

Attractive remuneration and social benefits

- Knowledge about seabed and soil engineering including soil calculations is a big plus;
- Excellent communication skills in Dutch and English.

## AI and more about TenneT

Since we use AI as part of our recruiting process, we would like to create transparency and clarity at this point. The AI serves exclusively as a supporting and recommending tool to make our processes even faster and more efficient. At no time are automated decisions made.

---

TenneT is a leading European grid operator. We are committed to providing a secure and reliable supply of electricity 24 hours a day, 365 days a year, while helping to drive the energy transition in our pursuit of a brighter energy future – more sustainable, reliable and affordable than ever before. In our role as the first cross-border Transmission System Operator (TSO) we design, build, maintain and operate over 25,000 kilometres of high-voltage electricity grid in the Netherlands and large parts of Germany, and facilitate the European energy market through our 17 interconnectors to neighbouring countries. We are one of the largest investors in national and international onshore and offshore electricity grids, with a turnover of EUR 9.2 billion and a total asset value of EUR 45 billion. Every day our 8,300 employees take ownership, show courage and make and maintain connections to ensure that the supply and demand of electricity is balanced for over 43 million people.
