

Technical Specialist Survey

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a passionate colleague at our location Arnhem Rijnpoort who will contribute to this and that might be you?

Your contribution to TenneT

As technical specialist you are responsible for the provision of expertise to seabed surveys and UXO clearance operations at sea. In close collaboration with your colleagues you ensure smooth and successful cable and platform installations in TenneT's 2GW program.

- In this role you provide technical expertise for geophysical and geotechnical surveys, UXO surveys, and UXO identification and clearance works in the Dutch offshore projects.
- You are focusing on the geotechnical investigations for the
- You ensure and check project documentation, data quality, and monitor changes to plans in all project phases
- You act as technical support in tendering, negotiating and contracting in the field of offshore survey and explosive ordnance clearance
- You coordinate and brief client representatives, control the works on site on the vessel or local site offices, as well as cooperate closely with all companies involved in a project on technical level
- You support the project management for cable installation with expertise on the ground (burial assessment) and in the documentation of post installations surveys, as well as final as laid documentation

Your profile and background

- This position requires an academic working and thinking level and a relevant university degree (Master/Bachelor) in survey or geology. Alternatively you have a comparable qualification.
- You have profound working experience in the field of offshore survey, preferably offshore installations, offshore experience, and offshore aptitude.
- You have sound experience with ArcGIS or equivalent geographic information systems, preferably also AutoCAD.
- You show independence, initiative, and the ability to work in a team. This is for you just as natural as strong communication skills and very good English skills. Dutch language skills are a big advantage.

Additional information

- As of 1st of March or earlier if possible
- The weekly working time is 40 hours a week
- Type of contract is indefinite
- Job interviews for this position can be (partly) in English. Please send us your application document in English.
- Due to the holidays you receive feedback on your application in the 2nd week of January

- You are willing to travel and have a valid driver's license.
- You live in the Netherlands

This will be our challenge

Large Projects Offshore is a key contributor to the energy transition. The Unit is responsible for the current and future development of the offshore grid as a whole and subsequently for the development and realization of the DC interconnectors and the Offshore Wind Farm grid connections in both the German and Dutch sectors of the North Sea.

AI and more about TenneT

Since we use AI as part of our recruiting process, we would like to create transparency and clarity at this point. The AI serves exclusively as a supporting and recommending tool to make our processes even faster and more efficient. At no time are automated decisions made.

TenneT is a leading European grid operator. We are committed to providing a secure and reliable supply of electricity 24 hours a day, 365 days a year, while helping to drive the energy transition in our pursuit of a brighter energy future – more sustainable, reliable and affordable than ever before. In our role as the first cross-border Transmission System Operator (TSO) we design, build, maintain and operate over 25,000 kilometres of high-voltage electricity grid in the Netherlands and large parts of Germany, and facilitate the European energy market through our 17 interconnectors to neighbouring countries. We are one of the largest investors in national and international onshore and offshore electricity grids, with a turnover of EUR 9.2 billion and a total asset value of EUR 45 billion. Every day our 8,300 employees take ownership, show courage and make and maintain connections to ensure that the supply and demand of electricity is balanced for over 43 million people.

Lighting the way ahead together
