

Systems Engineer

Tennet is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a passionate Systems Engineer at our location Arnhem, who will contribute to this and that might be you?

Your contribution to Tennet

As part of our Systems Engineering Program Team, you will have the opportunity to contribute to cutting-edge projects and develop valuable skills in systems engineering. You'll report to the Lead information management

Assist in Configuration & Change management according to Systems Engineering for the 2GW program:

- Support the Program Office in processing changes and improving modules in Relatics.
- Collaborate with other SE advisors to ensure efficient use of the Change modules.
- Assist Workstreams within LPO and project teams in processing changes accurately.
- Ensure changes are processed correctly according to the database and perform SE reviews on processed changes.
- Maintain close communication with Relatics development regarding data synchronization and workflow improvements.

Work closely with the Relatics developer team:

- Translate business-side issues into well-formulated tasks for developers and test new/fixed functionalities in Relatics workspaces.
- Perform small development tasks and provide feedback to developers.

Investigate missing/corrupted SE data issues and coordinate resolution with the Relatics development team.

Act as the main point of contact for Relatics users regarding user access, rights and roles, data integrity, and requests for new functionalities or data overviews.

Educate new users on using Relatics software and create training materials for new or existing modules in the Relatics database.

Your profile and background

- Bachelor's degree in computer science, engineering, or a related field.
- Proven experience in Configuration & Change management within a systems engineering environment.
- Proficiency in Relatics software and familiarity with its modules and functionalities.

For questions relating to the position:
Robin Velthorst
Lead Project Management Office - Hiring Manager

- Strong analytical and problem-solving skills, with the ability to translate business requirements into technical tasks.
- Excellent communication and interpersonal skills, with the ability to collaborate effectively with cross-functional teams.
- Experience in software testing and small-scale development tasks is preferred.
- Ability to work independently and manage multiple tasks simultaneously in a fast-paced environment.
- Prior experience in the offshore energy industry or a related field is a plus but not required.

This will be our challenge

Large Projects Offshore is a key contributor to the energy transition. The Unit is responsible for the current and future development of the offshore grid as a whole and subsequently for the development and realization of the DC interconnectors and the Offshore Wind Farm grid connections in both the German and Dutch sectors of the North Sea.

AI and more about TenneT

Since we use AI as part of our recruiting process, we would like to create transparency and clarity at this point. The AI serves exclusively as a supporting and recommending tool to make our processes even faster and more efficient. At no time are automated decisions made.

TenneT is a leading European grid operator. We are committed to providing a secure and reliable supply of electricity 24 hours a day, 365 days a year, while helping to drive the energy transition in our pursuit of a brighter energy future – more sustainable, reliable and affordable than ever before. In our role as the first cross-border Transmission System Operator (TSO) we design, build, maintain and operate over 25,000 kilometres of high-voltage electricity grid in the Netherlands and large parts of Germany, and facilitate the European energy market through our 17 interconnectors to neighbouring countries. We are one of the largest investors in national and international onshore and offshore electricity grids, with a turnover of EUR 9.2 billion and a total asset value of EUR 45 billion. Every day our 8,300 employees take ownership, show courage and make and maintain connections to ensure that the supply and demand of electricity is balanced for over 43 million people.

Lighting the way ahead together
