

## Product Owner Digital Checkers

TenneT is growing fast to realize its strategic ambitions. We play a leading role in driving the energy transition. We are looking for a passionate Product Owner Digital Checker at our location in Arnhem, who will contribute to this and that might be you?

### Your contribution to TenneT

Does developing digital tooling give you energy? Is being a bridge between IT and the running business something you are a natural at? Then you found your new role within TenneT!

As Product Owner Digital Checkers, you will be responsible for creating roadmaps aimed at improving current digital tools as well as developing new ones for the Data & Documentation Control (DDC) team. Daily business of the team is data entry & control, digitalization of data flows and improvement of data quality; the digital tools in use are a crucial part of ensuring we can keep up with the increasing amount of assets build and maintained by TenneT in the Netherlands. Our mission is to ensure data is FAIR (findable, accessible, interoperable and reusable) for the TenneT Dutch onshore operation & maintenance departments.

This is a new role within the team and part of the increasingly important role DDC plays in the digitalization of asset data flows within TenneT; it is needed to ensure communication with IT goes smoothly, create inspiring roadmaps and respect budget & timelines. Your goal is to ultimately increasing the efficiency of the data entry & controls, therefore it would be required to work side by side the Data Controllers who acts as Key Users and use the tools daily, IT Enterprise Architects, Functional Application Managers and external parties who help us build and keep those tools operational. Therefore, it is crucial for the candidate to be available in the central Arnhem office on a regular basis (~ 2 times per week). Additional trips to other office locations (e.g. Gouda) can be requested.

List of tasks include:

- Owns and maintains a group of digital checkers owned by DDC, including the quality of those products
- Develops and implements products' vision and roadmaps, ensuring alignment with team objectives
- Defines complete, integral and consistent product criteria or business requirements
- Owns development/maintenance budget of the products and is responsible for the value delivery of the products in alignment with Lead DDC
- Coordinates with internal and external stakeholders involved in the product development
- Actively retrieves team needs in all phases of product development and maintenance
- Contribute to digitalization strategy development & implementation with operational perspective
- Monitors progress, identifies deviations and prepares reports and evaluations for informed decisions of Lead Data and Documentation Control

## This will be our challenge

Grid Field Operations is executing Field Operations, Maintenance and (Baseload) Projects. We ensure the integrity and safety of our assets entrusted to us, while also ensuring their maximum availability. We make sure that the onshore grids of TenneT is reliable in Germany and the Netherlands.

## AI and more about TenneT

Since we use AI as part of our recruiting process, we would like to create transparency and clarity at this point. The AI serves exclusively as a supporting and recommending tool to make our processes even faster and more efficient. At no time are automated decisions made.

---

TenneT is a leading European grid operator. We are committed to providing a secure and reliable supply of electricity 24 hours a day, 365 days a year, while helping to drive the energy transition in our pursuit of a brighter energy future – more sustainable, reliable and affordable than ever before. In our role as the first cross-border Transmission System Operator (TSO) we design, build, maintain and operate over 25,000 kilometres of high-voltage electricity grid in the Netherlands and large parts of Germany, and facilitate the European energy market through our 17 interconnectors to neighbouring countries. We are one of the largest investors in national and international onshore and offshore electricity grids, with a turnover of EUR 9.2 billion and a total asset value of EUR 45 billion. Every day our 8,300 employees take ownership, show courage and make and maintain connections to ensure that the supply and demand of electricity is balanced for over 43 million people.
